

INDEX

A

acute lymphoblastic leukaemia, 121
ADAR, 19, 95
adenosine deaminases that act on RNA
(see ADAR)
adenovirus, 24, 132
Airn, 7, 97, 114, 118, 119
AGO/Ago (see also Argonaute), 5, 6, 22, 24,
32, 34, 35, 40, 41, 42, 43, 44, 45, 46,
48, 98, 128, 129, 137, 138
Alzheimer's disease, 7, 95, 121, 135
AMO, 130, 132
Amphimedon queenslandica, 8
ANRIL, 119, 121–122
antagomir, 129, 130, 131
antagoNAT (see also natural antisense
transcript), 97, 138, 139
anti-mRNA oligonucleotide (see AMO)
antisense, 3, 7, 8, 42, 43, 44, 55, 65, 91–99,
106, 107, 114, 119, 121, 122, 127, 128,
130, 133, 135, 136, 137, 138, 139, 140
aortic aneurysm, 121
Arabidopsis thaliana, 33, 36, 66
Argonaute, 4, 6, 17, 18, 20, 21, 25, 39, 40,
45, 59, 96, 98

B

BLV, 24
bovine leukaemia virus (see BLV)

C

Caenorhabditis elegans, 4, 8, 18, 20, 21,
31, 62
cancer, 6, 20, 48, 49, 53, 54, 55, 105, 106,
108, 113, 119, 121, 122, 130, 132, 135
catalysis, 82, 84, 85, 86, 88
C/D box RNA, 54, 55, 56, 57, 58, 59, 60, 61,
62, 63, 64, 65, 66, 67, 68, 69, 70
CDKN2B antisense RNA 1 (see ANRIL)
chronic lymphocytic leukaemia (see CLL)
cis-regulation, 113, 120
cleavage and polyadenylation-stimulating
factor (see CPSF)

CLL, 135
clustered regularly interspersed short
palindromic repeats (see CRISPR)
colorectal cancer (see CRC)
coronary artery disease, 121
CPSF, 87
CRC, 135
CRISPR, 8
CRISPR RNA (see crRNA)
crRNA, 8

D

deadenylation, 32, 33, 36, 41
decapping, 31, 32, 36
degradome, 29, 34, 36
development, 1, 2, 9, 10, 17, 18, 33, 40, 41,
48, 49, 54, 96, 99, 105, 114
DGCR8, 18, 19, 22, 129
diabetes, 60, 105, 108, 121
Dicer, 17, 18, 19, 20, 21, 22, 24, 59, 95, 96,
106, 128, 129, 135, 136
DiGeorge syndrome critical region gene 8
(see DGCR8)
DMD, 130, 132
DNA methylation, 6, 40, 41, 95, 134, 137, 138
dosage compensation, 93, 113, 118
double-stranded DNA (see dsDNA)
double-stranded RNA (see dsRNA)
Drosha, 17, 18, 19, 20, 21, 22, 24, 95,
128, 129
Drosophila melanogaster, 21, 39, 40, 41, 42,
44, 45, 46, 48, 114, 117, 118, 119, 121
Drosophilid, 121
dsDNA, 24, 35
dsRNA, 4, 18, 19, 20, 21, 95, 96, 106,
107, 135
Duchenne muscular dystrophy (see DMD)

E

EBV, 24
ENCODE project, 3, 116
endogenous siRNA (see endo-siRNA)
endo-siRNA, 96, 98, 99, 135, 136
enhancer RNA (see eRNA)

epigenetics, 6, 9, 92, 96, 97, 98, 99, 127, 133, 134, 135, 136, 138, 139, 140
 Epstein–Barr virus (see EBV)
 eRNA, 120
Escherichia coli, 8
 EST, 115
Euglena gracilis, 57
 Evf2, 114, 118, 120
 evolutionary conservation, 113, 133
 exon, 3, 7, 60, 61, 80, 81, 82, 83, 84, 85, 87, 94, 104, 113, 121, 131
 expressed sequence tag (see EST)

G

gene
 expression, 1, 2, 4, 7, 10, 17, 18, 20, 29, 60, 70, 78, 80, 87, 88, 91, 92, 93, 96, 98, 105, 106, 108, 109, 113, 117, 118, 120, 121, 122, 127, 128, 133, 134, 135, 137, 138, 140
 silencing, 4, 40, 41, 59, 91, 92, 98, 127, 134, 136, 137
 therapy, 130, 132
 gene termini-associated small RNA (see TASR)
 genome, 1, 2, 3, 4, 6, 7, 8, 9, 18, 24, 34, 36, 39, 40, 41, 44, 49, 57, 61, 62, 65, 80, 91, 99, 104, 105, 109, 114, 116, 118, 119, 122, 128, 135, 136
 genomic quality control, 98, 99
 germline, 39, 40, 41, 42, 43, 44, 48, 49
Giardia lamblia, 59, 62
 glioma, 121
 group II intron, 79, 80, 84, 85, 86, 88

H

H/ACA box RNA, 23, 24, 54, 55, 56, 57, 58, 59, 60, 61, 63, 65, 66, 67, 69, 70
 HCV, 130, 139
Helicobacter pylori, 8
 hepatitis C virus (see HCV)
 herpes simplex virus, 24
 heterochromatin protein 1 (see HP1)
 histone modification, 40, 41, 96, 139
 HP1, 44, 46, 134

I

ICG, 134
 imprinting, 7, 92, 93, 113
 interchromatin granule (see ICG)

intergenic, 7, 40, 113, 114, 115, 120, 123, 128, 133
 intron (see also group II intron), 3, 7, 18, 21, 23, 61, 62, 79, 80, 81, 82, 83, 84, 87, 94, 104, 128, 133
 ischaemic stroke, 121

K

Kaposi's sarcoma-associated herpes virus (see KSHV)
 KSHV, 24

L

let-7, 19, 20
lin-4, 31
 lincRNA, 7, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 133, 134, 136
Listeria monocytogenes, 8
 LNA, 130, 131
 lncRNA, 5, 6–7, 61, 105, 113, 114, 115, 118, 119, 120, 122, 123, 127, 128, 132, 133, 134, 135, 136, 138, 140
 locked nucleic acid (see LNA)
 long intergenic non-coding RNA (see lincRNA)
 long non-coding RNA (see lncRNA)
Lymnaea stagnalis, 106

M

MALAT-1, 118, 121, 122
 malignant melanoma, 121
 Marek's disease virus (see MDV)
 MDV, 24
 metastasis associated in lung
 adenocarcinoma transcript-1 (see MALAT-1)
Methanosarcina mazei, 8
 miRISC, 20
 miRLC, 21
 miRNA-induced silencing complex (see miRISC)
 miRNA loading complex (see miRLC)
 miRNA mimic, 127, 129, 132, 140
 monoallelic gene expression, 98

N

NAT, 91–99, 138, 139, 140
 natural antisense transcript (see NAT)
 NFAT, 118, 121
 nuclear factor of activated T-cells (see NFAT)

O

- 2'-O-methylation, 42, 53, 54, 55, 56, 58, 70
- open reading frame (see ORF)
- ORF, 7, 8

P

- PAPI, 48
- PARE, 34, 36
- parallel analysis of RNA ends (see PARE)
- parental imprinting, 92
- partner of PIWIs (see PAPI)
- PASR, 3, 6
- peptide nucleic acid (see PNA)
- pervasive transcription, 3, 9
- piRNA, 4, 5, 6, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49
- piwi-interacting RNA (see piRNA)
- PNA, 130, 131
- post-transcriptional modification, 53, 54, 60, 70
- Prader-Willi syndrome (see PWS)
- pRNA, 136, 137, 138, 140
- promoter-associated RNA (see pRNA)
- promoter-associated small RNAs (see PASR)
- promoter upstream transcripts (see PROMPT)
- PROMPT, 3, 6
- pseudogene, 4, 7, 67, 92, 103–109, 136
- Pseudomonas aeruginosa*, 8
- pseudouridylation, 53, 54, 55, 56, 57, 58, 60, 70
- PWS, 60, 61
- Pyrobaculum aerophilum*, 65

R

- regulation of gene expression, 1, 10, 70, 87, 91, 105, 117, 122, 127, 128
- regulatory RNA, 1–10, 21, 25, 91, 92
- ribonucleoprotein (see RNP)
- ribonuclease, 95
- ribosome biogenesis, 53, 58, 70
- ribozyme, 60, 79, 80, 82, 86, 88
- RISC, 4, 5, 18, 20, 21, 25, 29, 30, 40, 96, 98, 99, 106, 108, 128, 129, 132
- RISC-loading complex (see RLC)
- RITS, 137, 138
- RLC, 21
- RNA
 - activation (see RNAa)
 - editing, 19, 94, 95, 99, 128
 - interference (see RNAi)
 - masking, 91, 93–95, 99

- RNAa, 137
- RNAi, 4, 59, 95–96, 99, 106, 109, 116, 128
- RNA-induced silencing complex (see RISC)
- RNA-induced transcriptional silencing complex (see RITS)
- RNA interference (see RNAi)
- RNP, 56, 57, 60, 67, 69, 70, 82
- rRNA, 6, 54, 56, 58, 59, 60, 64, 67, 103, 134, 136

S

- Saccharomyces cerevisiae*, 54, 68
 - seed sequence, 29, 30
 - short hairpin RNA (see shRNA)
 - shRNA, 138
 - SILAC, 33
 - siRNA, 4, 6, 21, 31, 33, 41, 44, 92, 96, 97, 106, 107, 120, 127, 129, 132, 137, 138, 139, 140
 - small interfering RNA (see siRNA)
 - small nuclear RNA (see snRNA)
 - small nucleolar RNA (see snoRNA)
 - small temporal RNA (see stRNA)
 - snoRNA, 3, 4, 6, 7, 23, 24, 53–70
 - snRNA, 4, 56, 58, 60, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88
 - sperm development, 99
 - spliceosome, 4, 56, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88
 - splicing, 2, 4, 8, 9, 19, 21, 23, 53, 60, 61, 63, 69, 70, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 92, 93, 94, 118, 122, 128, 134, 135
 - stable isotope labelling by amino acids in cell culture (see SILAC)
 - stem cell, 49, 106, 120
 - stRNA, 18
- T**
- tandem repeat, 40
 - target recognition, 29
 - TASR, 3, 6
 - telomerase, 53, 60, 70
 - telomerase RNA (see TR)
 - termini-associated small RNA (see TASR)
 - TGA, 137, 138
 - TGS, 64, 137, 138
 - therapeutic, 4, 127, 128, 129, 130, 132, 137, 138, 139, 140
 - tiRNA, 3, 6
 - TR, 60

transcriptional

- gene activation (see TGA)
 - gene silencing (see TGS)
 - interference, 91, 94, 96, 114, 134
 - silencing, 97, 98, 105, 134, 137, 138, 140
- transcription initiation RNA (see tiRNA)
- transcriptome, 2, 3, 6, 31, 33, 92, 96, 99, 105, 115, 117
- translational repression, 4, 29, 31, 32, 33, 34, 35, 36, 41, 128, 129
- transposable element, 7, 8, 39, 40, 62
- transposon, 4, 5, 41, 42, 43, 44, 48, 49, 62
- tRNA, 24, 54, 56, 58, 59, 60, 61, 62, 70

U

- untranslated region (see UTR)
- UTR, 3, 4, 7, 29, 32, 33, 34, 35, 41, 70, 87, 108, 128, 132, 136

V

- Vibrio cholerae*, 8

X

- X chromosome inactivation (see XCI)
- XCI, 118, 134, 135
- Xenopus laevis*, 68, 103
- X-inactive specific transcript (see Xist)
- Xist, 6, 117, 118, 119, 134, 136
